grains available

Standard Shades

The colours illustrated above show our standard range for leathers with a pigmented surface coating. These shades correspond to the finished colours of **Smooth, Glazed and Embossed Goats** and **Skivers** and also approximate to the standard colours of **Chieftain Goat**. The **Bookcalf** Shades are less intense on account of their fully **aniline** finish

The colour 14 of our aniline leathers, e.g. **Bookcalf** are a special case since they are not dyed. We refer to these leathers as 'Fair', where the colour is determined solely by the tanning material used and may have a slight green, yellow or brown cast. Fair Skivers, in particular, can have a slightly pinkish tint.

Pentland Goat has its own special range of 22 colours for which a shade card is available. Specific shade cards are also available for the Bookcalf and Chieftain Goat. Please contact us for further information.
